

What is iSpaces™?

iSpaces is your cloud portal!

Offering an Internet-based operating system, the **first true cloud computer**, iSpaces provides many unique features including a seamless cloud storage solution, a native Web browser and multiple desktops. To see a full list of our features and applications, [click here](#).

iSpaces strives to be the fastest, most secure, easy to use, robust, accessible web-based operating system available! By delivering a **free** platform via the Web that can replace the functions on a local computer, you can access all things digital from any computer, anywhere, anytime. **iSpaces makes every computer your own computer!**

iSpaces offers a number of revolutionary features!

- **FileSpace** - Easily drag files between local drives, iSpaces storage, Dropbox and Box for a seamless cloud storage solution.
- **NonStopWeb** –Login and out of iSpaces from multiple computers and all open tabs and windows, the state of the user's interface, will remain the same. The native browser makes everything accessible across machines and time.
- **Easily Accessible** – iSpaces is available on Windows, Mac and Linux and in all major browsers such as Chrome, Internet Explorer, Safari, Firefox and Opera.
- **Spaces** – With multiple desktops available within iSpaces, called Spaces, simply drag and drop files or CloudBrowser windows between each space to stay organized and manage projects.
- **Security** - Stored in secure servers with regular backup and replication never worry again about losing data from a lost or stolen computer or failed hard drive. The cloud is always there!

Fast, free, persistent, simple—welcome to the cloud!
